ABOUT

Passionate Web Developer with expertise in FRONT-END Development. Proficient in writing clear, maintainable code and troubleshooting. Flexible in collaborating with diverse teams on various projects. Adaptable to remote or office work environments as needed by the company.

PROJECTS

PERSONAL PORTFOLIO WEBSITE

Created a portfolio responsive website which describes my education, experience, skills, contacts etc. The technologies used are HTML, CSS, JavaScript, Bootstrap.

WEB SCRAPING PROJECT

My web scraping project extracts ratings, reviews, and comments from Flipkart, facilitating insightful analysis. Additionally, the image scraping component retrieves images from Google, enriching datasets with visual information. Leveraging Python's libraries, these functionalities automate data collection, enabling efficient extraction of valuable insights for various purposes.

Guess the Number

The "Guess the Number" Java project is an interactive command-line game where players attempt to guess a randomly generated number within a specified range. Through user input and conditional statements, the game provides feedback to guide players toward the correct answer, fostering an engaging gaming experience..

Student Data Management

My Hibernate project is a streamlined CRUD command-line application tailored for managing student data efficiently. Leveraging Hibernate's ORM capabilities, it ensures seamless interaction with the database, offering comprehensive functionalities for creating, reading, updating, and deleting student records with ease and precision.
